# **Assignment Title: Analysis of Iterative Function**

# **Assignment Marks**

Max Marks: 10

## **Prerequisite:**

you should have good understanding of functions, loops

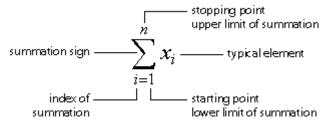

Category of functions like linear , logarithmic, linear log , polynomial , exponential etc Basic math problem solving

Series Progression, Series Summation (Arithmetic, Geometric, Harmonic)

#### Task:

Suppose a function takes a positive integer parameter n and function body is as follows Find the Time Complexity of the following Programs and find the Big Oh function

Show your working as well , preferably using summation notation ∑

```
for(int i=1 ; i<=n ; i++ ){</pre>
